

A comprehensive overview of key policy analyses for tackling clean energy research challenges

Objectives
 Provide the research community with tailored recommendations on concrete research areas and industrial challenges stemming from topical EU policies and, at the same time, enable policymakers to gain insights into the research and innovation (R&I) challenges faced by the clean energy sector.

Key achievements

- Broad coverage of a range of topics related to clean energy R&I
- Provision of tailored recommendations on concrete research areas and industrial challenges specifically designed to align with topical EU policies
- Tool for policymakers to gain valuable insights into the R&I challenges faced by the clean energy sector
- Timely publications in line with the evolving policy and research landscapes
- Useful tools for the EERA and SET-Plan community to shape the dialogue between the research community and policymakers
- Privileged tool to foster collaboration and engagement between policymakers, researchers, and other stakeholders in the clean energy sector
